With a passion for software engineering cultivated through years of dedicated study and practical experience, I bring a dynamic skill set to the table. Having honed my expertise at YoungShand, a prominent digital media company, I've played pivotal roles in developing and maintaining various websites, assuming leadership as a lead developer on multiple projects. My commitment to innovation and continual learning, coupled with hands-on experience, positions me as a valuable asset in any software engineering endeavor. Based in Auckland, New Zealand, at 23 years old, I am poised to contribute meaningfully to the ever-evolving tech landscape.

Professional Experience

YoungShand
Full Stack Developer

At YoungShand, I played a key role in frontend and backend development, building new features for websites like Oceania and BlindLowVision. Additionally, I lead the development of YoungShand's current website rebuild, and have worked closely with a team of senior developers to enhance my skills and drive innovation.

Infection Risk Management
Quality Assurance Officer

In my role as a Quality Assurance Officer at Infection Risk Management, I conduct water testing for hospital water treatment systems. My responsibilities included sampling, data entry, administrative tasks, Excel analysis, and overseeing company systems to ensure compliance and safety standards were met."

Chuwar Baptist Church
Youth Coordinator

As the Youth Coordinator at Chuwar Baptist Church in Brisbane, I led and supported young individuals, organized various events, and fostered teamwork within the community. Balancing this role with my studies, I developed exceptional time management and organizational abilities, enriching my skill set and contributing to my professional growth.

Education

Queensland University of Technology
Conjoint degree in Psychology and Accounting - Scholarship Recipient
